_____ ”

“ _____
_____ ”

Dreams and Predictions for the Future

Tom: Can you imagine what the future will be like? What's your dream, Emma?

Emma: I'm very hopeful about the future! I dream of a peaceful world where everyone will live in harmony. All children will receive education, and nobody will be poor. People will care about each other, and the planet will be clean and green. What about you, Jack?

Jack: I don't think the future will be that bright. I guess robots and artificial intelligence will do most of the jobs, so many people won't have work. There might be poverty, and people may have to move to another planet, like Mars, to survive.

Tom: Wow, Mars sounds exciting! Jack, do you think life on Mars will be possible?

Jack: Maybe. People could build houses using solar energy and grow food in special greenhouses. But it will be very hard.

Emma: I don't think we'll need to live on Mars. If we focus on solving problems like pollution and climate change, we can save our planet.

Tom: That's a great idea, Emma! I want to study medicine in the future and help people stay healthy. What about you, Jack?

Jack: My dream is to become a computer engineer and create smart robots that will help people with housework and transportation.

Emma: Those are great dreams! I hope we all achieve our goals and make the world a better place.

Tom: Me too! Let's work hard to make our dreams come true. 😊

Predictions

1.What is Emma's dream for the future?

2.What is Tom's dream job? Why does he want to do it?

3.What does Jack want to become in the future?
