

OUR PLANET IN DANGER (Read and answer)

Our planet has many environmental problems. They threaten the future of our planet and the life of all living creatures. The first problem is deforestation. Humans destroy forests and cut down trees severely, so oxygen in the air decreases and the temperature increases. We have to protect forests and plant trees.

The second one is pollution. Humans throw rubbish into seas and land. Chemicals from factories pollute rivers and oceans. Our cars and factories pollute the air with smoke. The third one is wasting. We waste our water and electricity. We must use eco-friendly products and renewable energy like solar and wind energy. Before it is too late, we must take action to keep the balance of the nature.

1. What are the results of deforestation?
2. How do factories and cars affect the air?
3. What kind of energy sources should we use for a greener world?
4. Why is global warming dangerous for our life?

Match the Sentences (Cause & Effect)

Action

1. We must plant trees
2. You shouldn't turn on the lights
3. We should cycle more
4. We should use public transport

Reason

- a. because it is a waste of energy.
- b. because they produce oxygen for us.
- c. because private cars pollute the air.
- d. because it is good for health and the environment.

MULTIPLE CHOICE TEST

1. Global warming is the _____ in average temperature of the Earth.
A) fall
B) increase
C) balance
2. We should produce our energy from _____ sources like wind and sun.
A) fossil
B) renewable
C) nuclear
3. Trees clean the air and provide fresh _____ for living things.
A) water
B) air
C) solar
4. Farmers shouldn't use _____ because they are harmful to our health.
A) seeds
B) pesticides
C) solar energy
5. We should use _____ to go to school or work to reduce air pollution.
A) private cars
B) public transportation
C) driverless cars
6. We should use eco-friendly light bulbs and turn off the TV to _____.
A) waste water
B) save electricity
C) pollute the sea
7. To protect our natural resources, we should _____ glass, metal, paper and plastic.
A) recycle
B) destroy
C) throw

Fill in the blanks with the words given below.

**recycle / responsible / eco-friendly / melting / climate / solar / wind /
deforestation / balance / protect**

1. Global warming is changing the _____ and glaciers are _____.
2. We are _____ for this difficult situation.
3. We must _____ and use _____ products to protect the environment.
4. We should use renewable energy like _____ and _____ energy.
5. We must stop _____ because trees clean the air and provide oxygen.
6. We should _____ wild animals because they are important for the _____
7. of the nature.
8. Always check for _____ products when you go shopping.
9. Greenhouse gases are increasing the temperature, so the ice in the poles is _____.
10. Humans are _____ for polluting the rivers and oceans.
11. We should _____ glass, metal and paper to save our natural resources.

eco friendly

Put the sentences in order

How to plant a tree?

- () Next, place the seed in the hole.
- () Finally, water your young tree.
- () First, get some seeds.
- () Second, dig a hole.
